

Agentic Engineering Workshop — Greenfield

Practical information and preparation

Thanks for booking a workshop with us. To get the most out of the day, please read through the points below and prepare the few things we mention.

What to prepare before the workshop

1. Groups

- Form groups of 2–3 people in advance.
- For this workshop it doesn't matter how the groups are composed — group people however is most convenient.

2. Tools

- Each group works on a single shared computer during the exercise, so each group needs at least one coding agent installed and ready (e.g., Claude Code, Codex, Cursor, or GitHub Copilot).
- Make sure that computer has enough token / usage quota to code actively throughout the day.

3. Share the exercise material in advance

- Ahead of the workshop we'll send you the exercise material (instructions and skills).
- Please forward it to the groups and ask them to read the exercise beforehand, and optionally set up the skills in their project, so we can dive straight in on the day.

4. Room and setup

- We need a room where we can show slides for the presentation, exercise introduction, demo, and reflection.
- During the exercise, participants can sit together in the same room, or go back to their own desks. We walk around and help.

Agenda

Time	Activity
09:00 – 09:50	Presentation
09:50 – 10:00	Break
10:00 – 10:30	Exercise introduction
10:30 – 12:00	Exercise part 1
12:00 – 12:30	Lunch
12:30 – 14:00	Exercise part 2
14:00 – 15:00	Demo
15:00 – 15:30	Reflection + Q&A;

Practical details

- The workshop runs from 09:00 to 15:30.
- We typically arrive 08:30 – 08:45 to set up.
- Please reach out if you have any questions before the day — we're happy to help.

We look forward to seeing you!
